Kanpur, India

PROFESSIONAL SUMMARY

Computer Science (Data Science) student skilled in full-stack development, problem-solving, and building user-centric applications. Experienced in developing scalable projects using React, Node.js, MongoDB, and Python. Strong understanding of Data Structures, APIs, and UI/UX principles. Passionate about creating impactful digital products and continuously learning new technologies.

PROJECTS

● Naagrik – Civic Issue Reporting Platform (Full Stack)

Tech Stack: React, Vite, Tailwind CSS, Firebase Auth, Firestore, Firebase Storage

- Built a real-time issue reporting platform for citizens
- Implemented secure authentication and database management using Firebase
- Designed a public dashboard for tracking issues transparently
- Enabled image uploads and verification-based publishing system
- Focused on solving real-world civic problems with scalable design

- **Unlazy – Learning OS (Full Stack)**

Tech Stack: React, Node.js, Express, MongoDB, Vite, Tailwind CSS

- Developed a full-stack learning platform focused on productivity and digital wellness
- Implemented modular dashboard, habit tracking, and spaced repetition system
- Built a responsive and distraction-free UI for better user engagement
- Designed backend APIs using Node.js and Express
- Managed data using MongoDB for scalability

● Movie Recommendation System (Machine Learning)

Tech Stack: HTML, CSS, JavaScript, Figma

- Designed and developed the frontend interface for the recommendation system
- Created a clean, responsive UI for displaying personalized movie suggestions
- Focused on user experience and intuitive navigation
- Collaborated with backend team to integrate UI with recommendation logic
- Contributed to project documentation and presentation structure

- **Speech Emotion Recognition (AI / Machine Learning)**

Tech Stack: Python, Audio Processing, Machine Learning

- Built a model to detect emotions from speech signals
- Used audio feature extraction techniques for processing
- Classified emotions like happy, sad, and angry
- Improved model performance through experimentation

● Library Management System (C Programming)

Tech Stack: C, File Handling, Data Structures

- Developed a console-based system for library operations
- Implemented book issue/return and member management features
- Used file handling for persistent storage
- Applied data structures for efficient data handling

Education

B.Tech in Computer Science (Data Science)

Maharana Pratap Engineering College
2022 - 2026

CGPA: 7.0/10

Class 12 (ISC Board)

Mother Teresa Mission Higher Secondary
School

2020 75%

Class 10 (ICSE Board)

Mother Teresa Mission Higher Secondary School

2018	72%
------	-----

TECHNICAL SKILLS

- **LANGUAGES:** JAVA, PYTHON, C++, C, JAVASCRIPT, HTML5, CSS3
- **FRONTEND:** REACT.JS, TAILWIND CSS, RESPONSIVE DESIGN, UI/UX PRINCIPLES
- **BACKEND:** NODE.JS, EXPRESS.JS, REST APIS
- **DATABASE:** MONGODB, FIREBASE FIRESTORE
- **TOOLS & PLATFORMS:** GIT, GITHUB, VS CODE, POSTMAN, FIGMA
- **CORE CONCEPTS:** DATA STRUCTURES & ALGORITHMS, OOP, DBMS (BASIC)
- **OTHER SKILLS:** TECHNICAL DOCUMENTATION, PUBLIC SPEAKING, CONTENT CREATION

ACHIEVEMENTS

- Qualified Smart India Hackathon (Internal Round) – 2023
- Winner – Reel Making Competition
- Directed a Short Film

LEADERSHIP

- Secretary – Shutter Society (Photography Club)
- Organized Short Film Making Competition
- Managed college events (SIH, exhibitions, orientation)

SOFT SKILLS

- Problem Solving
- Communication Skills
- Leadership & Teamwork
- Adaptability & Quick Learning
- Time Management
