PROFESSIONAL SUMMARY

Computer Science student with expertise in Java and project experience in Python, C, and C++. I leverage visual storytelling skills from filmmaking and photography to explain technical projects and ideas clearly. Eager to solve problems at the intersection of logic and creativity.

TECHNICAL SKILLS

Languages Java, C, C++, Python

Technologies : HTML, CSS, JavaScript, MySQL, Machine Learning

Area of Interests: Data Science, Java, Data Structures & Algorithms

Tools : Git, Github, IntelliJ, Pycharm, VS Code

Core Subjects: Operating System, DBMS, Computer Networks, OOPs

EDUCATION

BTech CSE - (Data Science)

2022 - Present

Maharana Pratap Engineering College

Intermediate

2019 - 2020

ISC Board

High-School

2017 - 2018

ICSE Board

PROJECTS

Movie Recommendation System :

As part of a four-member team, we developed a recommendation system that analyzes user ratings and viewing data to provide personalized movie suggestions tailored to individual tastes.

Speech Emotion Recognition :

Developed a machine learning model in Python that analyzes vocal features from audio signals to classify human emotions such as happiness, sadness, and anger.

Library Management System :

A console-based Library Management System built in C to handle book inventory, member records, and book issuance/returns, utilizing file handling for data persistence.

CERTIFICATIONS & ACHIEVEMENTS

Data Science 101 : Mastering fundamentals of data exploration, machine learning, & statistical analysis.

Internal SmartIndia Hackathon (SIH) 2023 :

Qualified in Internal (SIH) 2023, developing an innovative problem-solving project with real-world impact.

Growth School's Online AI Workshop :

Attended Growth School's Online AI Workshop, gaining insights into modern AI applications and industry practices.

SKILLS

Keen Observer

Orator Skills

Multitasking

Persuasive Skills
